

Compliments on Norbert's Workshop

in Canada, Los Angeles, Florida

It's not often I say that a seminar or workshop is life-changing but Norbert's was for me. I already knew a lot about health, what to cultivate and what to avoid. So it's not like I was a fast-food junkie who learned how to eat better. There is research out there that Norbert knows about and can demonstrate that I had no idea about. I've heard him four times and have learned a lot each time. I suspect it's the only way to get this important information and he delivers it in an entertaining way. I highly recommend this.

Harriet Schock

I am still processing all of the information I learned at Norbert's workshop. This is truly life saving knowledge and is relevant to all ages. His teaching style is one of complete transparency and his gracious commitment to answer any and all questions is a refreshing change in an otherwise secretive industry. A must see. I highly recommend it!

Lisa Sadowski

My only 'problem' now is the meeting was too short! You have so much to give and we are hungry for it! Thank you thank you for giving us all you have already and I am ready for more!

Ava Callaway Licensed Massage Therapist

Thank you Norbert:

This was a great workshop. It was very informative and well delivered. I became educated on (previously) hidden sources that can negatively affect one's health and what can be done about it. I look forward to using this information and technology towards a healthier and more energetic future! Thank you again,

Sincerely,
Steven

Dear Norbert,

Thank you very much for all your information but especially for your comprehensive and inspiring talk I was very touched.

Heidi

Hi Norbert

Of all the workshops I have been to and I have been to a few of them in my career this workshop was indeed the most thought provoking and different main stream thinking I have attended. It was time very well spent I do hope you return and come to New Brunswick (Canada) as a lot of people would be interested in this technology for themselves and to share with others. I am a nurse and work with 70 other health professions nurses, OT, physio, dietitians, RT. Thanks so much for sharing your time on Saturday and making a difference in people's quality of life.

Sincerely, Debbie

If you are looking for a quantitative education on improving quality of life, you have no choice but to attend one of these extremely fun and life changing workshops. My only regret was that it was too short! Simply tremendous.....
