

Compliments on Norbert's Workshop

Florida November 18 2018

This is one of the best seminars I have ever attended.

I learned so much from this seminar. It's the first time I have seen a presentation with correlations among various technologies. That explains why a correct treatment might not work because another treatment is needed. I see the underlying things that must be addressed.

Also I understand necessary bio-hacks for the things we cannot control. Thank heavens some have researched, tested, and developed workable technology. Using various audience members to demonstrate how various devices enhance strength was inarguable.

Sioux Hard

This is an education in itself! We have to live in a toxic environment and we have a means of vanquishing it – even though we'll be coming back for part 2. I am very excited about this technology. Thank you Norbert. There are lots to use in safeguarding the body against the physical universe and its harmful elements that are upon us.

Adrienne Craig

Great Presentation. Amazing technology and information! Simple to understand, for the most part. Would be interested to try a few products. Thank you very much for sharing your incredible knowledge and technology.

RD

Amazing! This tech addresses physical/spiritual issues. The data is invaluable and I hope to see more. I can feel the change in my electrons. I actually feel more alive after participating in a demo. Thank you!

Dr. Pamela Joy

1) I do not have enough data on quantum physics to be able to wrap my head around the technology.

2) I could see the change but am unsure of the long-term effects.

It got addressed a few minutes later... well you filled in the gap so I have a better conceptual understanding. Thank you. Interesting all day long.

Dana Hanson

I appreciate his direct approach. He does not sugar coat BS. He offers solutions for real problems.

Aprecio que él habla una manera directa sin mentir. Él ofrece soluciones usables para problemas reales.
