Bees Protection & Well Being

The experiences with the Bien in the 7-Star formation, and our concept of the Bien in the 14-Star formation, show the SD25 B Bees Protection & Wellbeing device validity and use.

We look forward to future reports and feedback from the beekeepers who work with the SD 25 B:

they maintain and pass on the joy of beekeeping,
an increase of the honey yield,
improved honey quality,
preserved and multiple healthy colonies,,
a simplified work around the bees,
secure pollination,
offer bees a good quality of life,
help to live in the best coordination with the bees,
improve the quality of life of humans and bees,
and thereby improve the overall quality of life on our earth.

With my very best regards
In Love & Gratitude
